## Apple Time Machine Manual

After you select a backup disk, Time Machine immediately begins making periodic backups—automatically and without further action by you. The first backup may take a long time, depending on how many files you have, but you can continue using your Mac while a backup is underway. Time Machine backs up only the files that changed since the previous backup, so future backups will be faster.

## Back up your Mac with Time Machine - Apple Support

When Time Machine is turned on, it automatically backs up your Mac and performs hourly, daily, and weekly backups of your files. When you use Time Machine on a computer using Apple File System (APFS), Time Machine not only keeps a copy of everything on your backup disk, it also saves local snapshots of files that have changed on your internal ...
