Send Intradiem Session exceptions back to Aspect eWFM using a file transfer method instead of the Updater API. When the Aspect eWFM provider is configured to send exceptions via a file over SFTP, Intradiem Schedule exceptions are captured and processed into the file to follow the format of the Updater API call.

Managing the Aspect eWFM Provider - Intradiem

Until version 3.0, Procomm Plus shipped with a separate ASPECT manual that had mostly the same content as the ASPECT help file. At one point, Quarterdeck did make available an ASPECT Script User's Guide that could be purchased separately, but this was once again mostly identical to the help file.

ASPECT tips and tricks - ASPECT scripting

The first line identifies two nodes, called node1 and node2, and a single relationship between node1 and node2 of type typeA. The second line specifies three new nodes, node3, node4, and node5; here "node2" refers to the same node as in the first line.

Moreover, file.type is generally reliable only for common file types like images, HTML documents, audio and video. Uncommon file extensions would return an empty string. Client configuration (for instance, the Windows Registry) may result in unexpected values even for common types.

File.type - Web APIs | MDN

Most people look at the extension of a file and then guess the type of file from that extension. For example, when you see a file with an extension of gif, jpg, bmp, or png you think of an image file, and when you see a file with an extension of zip, you assume the file has been compressed using a zip compression utility.
