OWNER'S NAVOMATIC 300 MANUAL The Cessna Navomatic 300 autopilot is an all-electric, single-axis, aileron control system that provides lateral and heading stability and con- trol. The system uses an inclined rate gyro and a directional gyro (DG) for attitude and heading deviation sensing, respectively.

Navomatic 300 Autopilot Type AF-394A Owners Manual
The ARC 300A autopilot is what we call a "single axis" system, meaning it only controls the roll axis of the aircraft, only connected to the ailerons. This system has no effect on the other two axis, pitch and yaw. All aircraft rotate around three axis, roll, pitch and yaw; the 300A is only utilized in the roll axis.

Cessna Autopilot Manual This section of the manual deals with the assignment of external computer peripheral buttons to most closely simulate the operation of the autopilot in a real-life scenario. If you are missing the necessary external peripherals, you may elect to skip this section.

Cessna Autopilot Manual - Bit of News
Cessna first introduced an optional autopilot in the 1962 172C model, and their choice of manufacturer for factory-installed autopilots and avionics was Cessna's own division known as ARC. Aircraft Radio Corporation (ARC) got its start in 1924 and played a significant role in the development of early avionics.

Includes annual summary and 11 supplements

This book provides an introduction to the principles of automatic flight of fixed-wing and rotary wing aircraft. Representative types of aircraft (UK and US) are used to show how these principles are applied in their systems. The revised edition includes new material on automatic flight control systems and helicopters.
