Dance Of Days is a decent enough book. It tells stories well and covers as much as it can through the political activist-colored glasses of the author, Mark Andersen. The book was co-written (read cleaned up) by DC alt-journalism staple Mark Jenkins, who probably and thankfully removed the tear-stained confessional aspects of Andersen's writing ...

This book considers the history of Do It Yourself art, music and publishing, demonstrating how DIY strategies have transitioned from being marginal, to emergent, to embedded. Through secondary research, observation and 30 original interviews, each chapter analyses one of 15 creative cities (San Francisco, Los Angeles, Dusseldorf, New York, London, Manchester, Cologne, Washington DC, Detroit, Berlin, Glasgow, Olympia (Washington), Portland (Oregon), Moscow and Istanbul) and assesses the contemporary situation in each in the post-subcultural era of digital and internet technologies. The book challenges existing subcultural histories by examining less well-known scenes as well as exploring DIY "best practices" to trace a template of best approaches for sustainable, independent, locally owned creative enterprises.

"An ambitious look at the last days of the Clash . . . as much a political history of the 1980s as it is a look at an influential band in its final years."--Publishers Weekly The Clash was a paradox of revolutionary conviction, musical ambition, and commercial drive. We Are The Clash is a gripping tale of the band's struggle to reinvent itself as George Orwell's 1984 loomed. This bold campaign crashed headlong into a wall of internal contradictions and rising right-wing power. While the world teetered on the edge of the nuclear abyss, British miners waged a life-or-death strike, and tens of thousands died from US guns in Central America, Clash cofounders Joe Strummer, Paul Simonon, and Bernard Rhodes waged a desperate last stand after ejecting guitarist Mick Jones and drummer Topper Headon. The band shattered just as its controversial final album, Cut the Crap, was emerging. Andersen and Heibutzki weave together extensive archival research and in-depth original interviews with virtually all of the key players involved to tell a moving story of idealism undone by human frailty amid a climatic turning point for our world. "The Clash's final chapter, after guitarist Mick Jones' 1983 departure, has largely been forgotten--until this book, in which authors Mark Andersen and Ralph Heibutzki argue that the punk pioneers were still creating vital music to the very end."--Rolling Stone, a companion to his 2014 documentary, Salad Days--featuring stories from local players such as Dave Grohl, Henry Rollins, and Ian MacKaye." --Washingtonian Magazine "Spoke...adroitly uses both photographs and oral histories to capture the importance of what can best be described as a cultural revolution within the nation's capital." --Shepherd Express "This coffee table version of the documentary [Salad Days] follows the D.C. scene's often politically-charged brand of punk rock, from Bad Brains to Jawbox, and of course the legendary Fugazi. And there's even the near-forgotten SOA, whose frontman Henry Rollins took his D.C. energy to L.A. where he stepped in as the singer for Black Flag." --Yellow Scene Magazine "A must-have for any rock historian or pop-culture buff...The perfect punk coffee table book." --Shockwave Magazine "Highly recommended...A must read for punk fans." --Chorus.fm/HiFiNoise "A worthy addition to the growing amount of literature on the American hardcore/punk scene. Spoke will look great on any aging punks' coffee table as a document to a vital, electric time." --Ink19.com "A forthright testament to a kaleidoscopic community. This is a rounded collection, with surprises on every page...It's collection that rocks." --Shelf Awareness for Readers The Washington, DC punk music scene of the 1980s gave birth to influential bands like Bad Brains, Minor Threat, and Fugazi. Here that era is portrayed in its purest form: an oral history by the creators themselves, including nearly two hundred photographs capturing the power and spirit of this politically progressive corner of American underground music. This stunning and intimate collection features rare images from Jim Saah, Cynthia Connolly, Bert Queiroz, and many others who documented this vibrant community. Compiled by Scott Crawford--whose critically acclaimed film Salad Days provided an unprecedented exploration into the 1980s DC punk scene--Spoke delves deeper into one of the most dynamic movements in US music history. Featuring: BAD BRAINS, THE TEEN IDLES, BLACK MARKET BABY, SOA, MINOR THREAT, GOVERNMENT ISSUE, VOID, IRON CROSS, THE FAITH, SCREAM, MARGINAL MAN, GRAY MATTER, BEEFEATER, KING FACE, RITES OF SPRING, DAG NASTY, EMBRACE, SOULSIDE, FIRE PARTY, SHUDDER TO THINK, IGNITION, FUGAZI, SWIZ, THE NATION OF ULYSSES, and JAWBOX.

Pulitzer Prize-winning photographer captures four electrifying punk shows in Washington, DC, in 1979; narrative by Alec MacKaye.

"The pictures, which include some posed portraits but are mostly concert shots, are the chief attraction. They freeze moments of adolescent release, vein-bulging intensity and sweaty communion that fuses performer and audience...Vivid and evocative." --Washington Post "Scott Crawford, the man behind the acclaimed documentary Salad Days, has given us another taste of the best-kept secret of 80s in his new book Spoke: Washington DC's hardcore punk scene." --Dazed "With music by Minor Threat, Void, Rites of Spring, Government Issue, and many others propelling the story of hardscrabble, Reagan-era D.C. as the hotbed for a new artistic outlet in Salad Days, Crawford saw the book as a way to scoop up important narrative from the cutting-room floor and find a new home for it." --Fast Company "Pockmarked with burned-out buildings and boarded-over storefronts, Northwest DC was once home to a vibrant and sometimes violent punk movement beginning in the early 1980s. For geeky 12-year-old Scott Crawford, that changed everything: He chucked comic books for punk rock and self-published a music zine from his mother's kitchen table in Silver Spring. This month, Crawford releases a book about those days, Spoke--a companion to his 2014 documentary, Salad Days--featuring stories from local players such as Dave Grohl, Henry Rollins, and Ian MacKaye." --Washingtonian Magazine "Spoke...adroitly uses both photographs and oral histories to capture the importance of what can best be described as a cultural revolution within the nation's capital." --Shepherd Express "This coffee table version of the documentary [Salad Days] follows the D.C. scene's often politically-charged brand of punk rock, from Bad Brains to Jawbox, and of course the legendary Fugazi. Leonard addresses core issues relating to gender, rock and the music industry through a case study of 'female-centred' bands from the UK and US performing so called 'indie rock' from the 1990s to the present day. Using original interview material with both amateur and internationally renowned musicians, the book further addresses the fact that the voices of musicians have often been absent from music industry studies. Leonard's central aim is to progress from feminist scholarship that has documented and explored the experience of female musicians, to presenting an analytic discussion of gender and the music industry. In this way, the book engages directly with a number of under-researched areas: the impact of gender on the everyday life of performing musicians; gendered attitudes in music journalism, promotion and production; the responses and strategies developed by female performers; the feminist network riot grrrl and the succession of international festivals it inspired under the name of Ladyfest.

An ambitious, accessible mix of history, autobiography, and how-to manual, this anti-manifesto challenges popular concepts of radical activism. A whirlwind tour across decades - through punk and student activism, identity and lifestyle politics, animal rights, armed struggle, patriotism, globalisation and beyond - this book seeks a radicalism that is both rigorously self-critical and genuinely populist. All the Power suggests how the seemingly most idealistic of enterprises - revolution - might be practically accomplished.

In Dance of the Trillions, David Lubin tells the story of what makes money flow from high-income countries to lower-income ones; what makes it flow out again; and how developing countries have sought protection against the volatility of international capital flows. The book traces an arc from the 1970s, when developing countries first gained access to international financial markets, to the present day. Underlying this story is a discussion of how the relationship between developing countries and global finance appears to be moving from one governed by the "Washington Consensus" to one more likely to be shaped by Beijing.

A renowned biologist's cutting-edge and unconventional examination of human reproduction and embryo research Scientists have long struggled to make pregnancy easier, safer, and more successful. In The Dance of Life, developmental and stem-cell biologist Magdalena Zernicka-Goetz takes us to the front lines of efforts to understand the creation of a human life. She has spent two decades unraveling the mysteries of development, as a simple fertilized egg becomes a complex human being of forty trillion cells. Zernicka-Goetz's work is both incredibly practical and astonishingly vast: her groundbreaking experiments with mouse, human, and artificial embryo models give hope to how more women can sustain viable pregnancies. Set at the intersection of science's greatest powers and humanity's greatest concern, The Dance of Life is a revelatory account of the future of fertility -- and life itself.
