Regarding economic and socio-demographic factors, farm education, size of cattle flocks and off-farm income were statistically significant and positive influence on technology adoption while age and farm experience had significant and negative effects on IT adoption decision.

This book gathers contributions from researchers and practitioners that foster user-centric, cross-modal and sustainable transport systems in Europe. It reports on cutting-edge approaches discussed within the project MOBILITY4EU, a Coordination and Support Action funded by the European Commission, and presented at the second conference “Towards User Centric Transport in Europe” that took place in Brussels in Fall 2018. The respective papers describe innovative approaches to improving urban mobility and accessibility, achieving zero-emission mobility, and guaranteeing, seamless operations. Co-creation approaches are also discussed. Highlighting technological, socio-economic and political strategies alike, the book provides researches and stakeholders with a comprehensive, timely snapshot of current measures and challenges for the mobility of tomorrow.

This book presents cases from different countries with a main focus on the perspectives of using precision farming in Europe. Divided into 12 chapters it addresses some of the most recent developments and aspects of precision farming. The intention of this book is to provide an overview of some of the most promising technologies with precision agriculture from an economic point of view. Each chapter has been put together so that it can be read individually should the reader wish to focus on one particular topic. Precision Farming as a farm technology benefits from large-scale advantages due to relatively high

investment costs and is primarily adopted on farms with medium to large field areas.

Widely regarded as the standard reference and text on evidence-based therapies--and now substantially revised--this book has introduced tens of thousands of clinicians and students to exemplary treatments for social, emotional, and behavioral problems in children and youth. Concise chapters focus on specific psychotherapy models. The developers of the respective approaches review their conceptual underpinnings, describe how interventions are delivered on a session-by-session basis, and summarize what the research shows about treatment effectiveness. The book explores important questions and challenges facing the field and identifies best practices for treatment dissemination in real-world clinical contexts. New to This Edition: *Existing chapters significantly revised with the latest treatment research. *Chapters on assessment, personalizing evidence-based therapies, clinical implications of developmental psychopathology, and advances in neuroscience. *Coverage of additional clinical problems (self-injury and suicidal ideation, bulimia nervosa, encopresis) and treatments (Early Start Denver Model for autism spectrum disorder, Internet-assisted and technology-enhanced interventions). *Chapters on implementation in complex mental health systems, as well as international models.

Issues in Nursing by Specialty / 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Nursing by Specialty. The editors have built Issues in Nursing by Specialty: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Nursing by Specialty in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Nursing by Specialty: 2011 Edition has been produced by the world ' s leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

The ubiquity of information, in part a consequence of the fast growth of Internet technologies, provides individuals with previously unknown opportunities to acquire and share information about new technology products. One may witness numerous situations where potential adopters observe the decisions (but not the reasoning) of others, and imitate their system usage behaviors. This implies that herd behavior can lead to en mass adoption and subsequent abandonment patterns. Adopting a herding lens, this dissertation investigates individuals' technology adoption and post-adoption behaviors. Drawing on the rich extant literature on technology adoption, post-adoption usage, and technology exploration, and integrating it with other relevant research streams, I aim to shed light on understudied determinants of individual decision-making regarding technological artifacts in highly uncertain environments. Each of the three essays concentrates on investigating different technology-related phenomena, i.e., adoption, usage, and exploration of technology by individuals through the lens of herd theory. My research follows the three-manuscript model. In the first essay, which focuses on the adoption phase, I look at user and technology characteristics and their interaction with the antecedents of herd behavior, observed popularity of prior adoption and perceived uncertainty. In the second essay, I extend my focus to the post-adoptive context and study the impact of the herd effect on how a user's task-technology-fit perceptions evolve over time. I also investigate factors influencing en mass abandonment in herd-like adoption conditions. In the third essay, which focuses on a specific explorative technology usage behavior, I investigate how team-level factors influence herd-like adoption and consequently explorative learning behaviors in the post-adoption stage.

Includes articles in topic areas such as autonomic computing, operating system architectures, and open source software technologies and applications.
