In cinema studies today, rarely do we find a direct investigation into the culture of capitalism and how it has been refracted and fabricated in global cinema production under neoliberalism. However, the current economic crisis and the subsequent Wall Street bailout in 2008 have brought about a worldwide skepticism regarding the last four decades of economic restructuring and the culture that has accompanied it. In this edited volume, an international ensemble of scholars looks at neoliberalism, both as culture and political economy, in the various cinemas of the world. In essays encompassing the cinemas of Asia, Africa, Latin America, Europe, and the United States the authors outline how the culture and subjectivities engendered by neoliberalism have been variously performed, contested, and reinforced in these cinemas. The premise of this book is that the cultural and economic logic of neoliberalism, i.e., the radical financialization and market-driven calculations, of all facets of society are symptoms best understood by Marxist theory and its analysis of the central antagonisms and contradictions of capital. Taking a variety of approaches, ranging from political economy, ideological critique, the intersection of aesthetics and politics, social history and critical-cultural theory, this volume offers a fresh, broad-based Marxist analysis of contemporary film/media. Topics include: the global albeit antagonistic nature of neoliberal culture; the search for a new aesthetic and documentary language; the contestation between labor and capital in cultural production; the political economy of hollywood, and questions of gender, sexuality, and the nation state in relation to neoliberalism.

The total world sales of filtration and separation equipment and spares are estimated at US\$29.5 billion in 2003. Good growth is forecast to continue through to 2009, on the back of the expansion in China, and the fresh and wastewater segment growth rates, with a CAGR of more than 6%." --Profile of the International Filtration and Separation Industry - Market Prospects to 2009, 5th Edition This revised and updated 5th edition includes increased coverage on the strategic direction of the industry, plus it offers forecasts, analysis and comment on the filtration and separation industry to 2009. The study also outlines the structure of the global industry, assesses market and technological trends, offers market figures and forecasts to 2009 and identifies the major players.

The four-volume set LNCS 8012, 8013, 8014 and 8015 constitutes the proceedings of the Second International Conference on Design, User Experience, and Usability, DUXU 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 282 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 83 papers included in this volume are organized in the following topical sections: DUXU in business and the enterprise, designing for the Web experience; product design; information and knowledge design and visualisation; and mobile applications and services.

Your everyday food choices can change the world—and make meals taste better than ever For anyone who has read *The Omnivore's Dilemma* or seen *Food, Inc.* and longs to effect easy green changes when it comes to the food they buy, cook, and eat, *The Conscious Kitchen* is an invaluable resource filled with real world, practical solutions. Alexandra Zissu walks readers through every kitchen-related decision with three criteria in mind: what's good for personal health, what's good for the planet, and what tastes great. Learn, among other things, how to: - Keep pesticides, chemicals, and other harmful ingredients out of your diet - Choose when to spend your dollars on organic fruit and when to buy conventionally grown - Avoid plastic—including which kinds in particular and why - Figure out what seafood is safe to eat and is sustainable - Use COOL (country of origin labels) to your advantage - Determine if a vegetable is genetically modified just from reading its PLU (price look up) code - Decipher meat labels in the supermarket - Cook using the least energy—good for the earth and your wallet - Eat locally, even in winter - Understand what “natural” and other marketing terms really mean - Buy packaged foods wisely Navigate farmers' markets, giant supermarkets, and every shop in between to find the freshest and healthiest local ecologically grown and produced meat, dairy, fruits, and vegetables—no matter where you live With *The Conscious Kitchen* as your guide, you will never again stand in the market bewildered, wondering what to buy. You can feel confident you are making the best possible choices for you, your family, and our planet. ALEXANDRA ZISSU writes about green living, food, and parenthood. She is the author of *The Conscious Kitchen*, coauthor of *The Complete Organic Pregnancy*, and contributes the “Ask an Organic Mom” column to *The DailyGreen.com*. Her stories have appeared in *The New York Times*, *The Green Guide*, *Cookie*, *Details*, *Bon Appétit*, *Self*, and *Health*, among other publications. She is also a public speaker and “greenproofer,” an eco-lifestyle consultant. Visit her website, [www.alexandrazissu.com](http://www.alexandrazissu.com).

A detailed look at the water industry and the trends that can lead to investment opportunities Water has quickly grown into a big global business, with annual revenues in the United States alone reaching over \$200 billion. In the years ahead, companies as well as governments must find innovative ways to address important issues within this field without sacrificing basic needs, such as safety of drinking water or the reliability of water for energy production. Nobody understands this better than author Neil Grigg, a forty-year veteran of the water industry, and now, with *Water Finance*, he shares his extensive experience with you. Most of the water business operates under the radar, but with this reliable resource, Grigg shines a bright light on this essential area and offers comprehensive coverage of the public responsibilities and private opportunities associated with it. While *Water Finance* does contain many facts and figures, it also takes the time to pull together the various aspects of water, going far beyond water as just a commodity, to skillfully explain it as the integrated business that it is. Opens with a detailed discussion of the water industry before turning its focus to water handling, which includes water supply, wastewater, industrial water, storm water, irrigation and drainage, and instream flows Reveals the different driving forces, and issues, surrounding the water industry such as government involvement, privatization, law and regulations, financial structure, water and health, and workforce capacity Offers insights on water industry business, careers, and investments Organized around the idea that the water business is about all aspects of handling water, from the global environment to your tap, *Water Finance* contains the information you need to succeed in this dynamic field.
