Apple's new MacBook Air (M1, 2020) is an absolutely fantastic laptop, and thanks to brilliant new additions, in the form of Apple's own M1 chip (which replaces the Intel processors used by the company) and an improved screen. In previous years, the MacBook Air was a reduced version of the MacBook, which was an excellent thin and light laptop for everyday use, but due to its low features did not really fit into intense creative workloads, such as editing, transfer ultra-high definition video or complex 3D animated scenes.
