Reproduction of the original: The Two Elsie by Martha Finley

In this engrossing memoir, one of the most controversial, influential, and inspirational figures in African politics today gives the full story of his crusade to save Kenya's natural resources, and specifically the African elephant--a crusade that set him against internal corruption, poverty, and dangerous criminals. Sometimes at the risk of his own life, Leakey's love of Kenya,

and his convictions about the direction his country--and all of sub-Saharan Africa--must take to survive, have been unshakeable. *Wildlife Wars* is the odyssey of an extraordinary man in an extraordinary land.

Solrunn Nes, one of Europe's most admired iconographers, here illuminates the world of Christian icons, explaining the motifs, gestures, and colors common to these profound symbols of faith. Nes explores in depth a number of famous icons, including those of the Greater Feasts, the Mother of God, and a number of the better-known saints, enriching her discussion with references to Scripture, early Christian writings, and liturgy. She also leads readers through the process and techniques of icon painting, illustrating each step with photographs, and includes more than fifty of her own original works

Many significant problems in metaphysics are tied to ontological questions, but ontology and its relation to larger questions in metaphysics give rise to a series of puzzles that suggest that we don't fully understand what ontology is supposed to do, nor what ambitions metaphysics can have for finding out about what reality is like. Thomas Hofweber aims to solve these puzzles about ontology and consequently to make progress on four central metaphysical problems: the philosophy of arithmetic, the metaphysics of ordinary objects, the problem of universals, and the question of whether the reality is independent of us. Crucial parts of the proposed solution involve considerations about quantification and its relationship to ontology, the place of reference in natural languages, the possibility of ineffable facts,

the extent of empirical evidence in metaphysics, and whether metaphysics can be properly esoteric. Overall, Hofweber defends a rationalist account of arithmetic, an empiricist picture in the philosophy of ordinary objects, a restricted form of nominalism, and realism about reality, understood as all there is, but idealism about reality, understood as all that is the case. He defends metaphysics as having some questions of fact that are distinctly its own, with a limited form of autonomy from other parts of inquiry, but rejects several metaphysical projects and approaches as being based on a mistake.

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and
