A theory conceived by Alfred Crosby in his 1986 book Ecological Imperialism: The Biological Expansion of Europe, 900-1900, which proposes that colonization was not only a form of cultural and political tyranny, it was also a form of environmental terrorism. Indeed, Crosby goes so far as to argue that the ecological dimension was in fact primary. His reason for suggesting this is the evident fact that wherever colonists settled they brought with them diseases that devastated the local ...

Ecological imperialism - Oxford Reference

Ecological imperialism is the theory, advanced first by Alfred Crosby, that European settlers were successful in colonization of other regions because of their accidental or deliberate introduction of animals, plants, and disease leading to major shifts in the ecology of the colonized areas and to population collapses in the endemic peoples. The many pathogens they carried with them adversely affected the native populations of North America, Australia, and Africa, and were far more destructive t
