Time

This is simply a superb book in metaphysics—handsomely written, cleverly argued, and exceedingly clear. A number of philosophical questions about ontology, mereology, vagueness, identity, persistence, modality, space, and time (and also about the relation of these issues to modern science) have been center stage for the last few decades in ...

This article provides a critical overview of the main arguments in favour of four-dimensionalism. It begins by discussing several issues that will help us better understand the nature of the debate between presentists and four-dimensionalists. Then the article discusses in detail the three main arguments in support of four-dimensionalism:
