CAT interface for Yaesu FT-857(D) The FT-857's CAT System allows the transceiver to be controlled by a personal computer. This allows multiple control operations to be fully automated as a single mouse click, or it allows a third-party software package (such as GBCAT) to communicate with the FT-8xx without (redundant) operator intervention.. The Optional CAT Interface Cable CT-62 is a ...

...

The radio can only be programmed using a cable that connects to the 8 pin mini-din socket at the rear of the unit. 6) FT-857, FT-857D, FT-897, FT-897D your programming cable is of a type that is powered from the serial port.

I cannot get the rig to talk to the computer

These radios use the Yaesu SCU-35 cable. It is a USB-to-serial cable with a Prolific PL2303 USB-to-serial chip. It is supported by the unmodified drivers USB in Windows and Linux. The cable uses 3.3 V voltage levels and is a two-wire cable, with GND on one wire and TxD and RxD wired together on the other wire.

CableGuide - CHIRP

For digital modes, I have to recommend the FT-450D, since it has an IF DSP, as opposed to the AF DSP on the FT-857D. Having the DSP in the IF stage stops some of the desense that you get due to strong signals in the passband that are allowed through when just using an AF DSP (which results in a "black-out" or "blanking" of the waterfall in ...
