Similarity: Similar Triangles

Figure %: Three pairs of congruent angles determine similar triangles In the above figure, angles A, B, and C are vertices of a triangle. If one angle moves, the other two must move in accordance to create a triangle. So with any movement, the three angles move in concert to create a new triangle with the same shape.

Geometry: Congruence: Proving Similarity of Triangles ...

The two triangles are similar triangles since they share two sets of common angles. Particularly, both triangles have a 90 degree angle and a 20 degree angle. The ratio of the corresponding sides of the similar triangles is $14/7 = 2$.
