Learning FreeNAS: Configure and manage a network attached ...

9.1. Swap Space¶. Swap is space on a disk set aside to be used as memory. When the FreeNAS ® system runs low on memory, less-used data can be “swapped” onto the disk, freeing up main memory.. For reliability, FreeNAS ® creates swap space as mirrors of swap partitions on pairs of individual disks. For example, if the system has three hard disks, a swap mirror is created from the swap ...
