Despite its complexity it's easy to zoom in and discover many details thanks to a zoom button, moreover there are several clickable items that open a text box.

At the Intersection between Mind Mapping and Infographics

Last week, we underscored the need to know the "rules of the road" when mapping the intersection of inclusion and social justice. The complex nature of this work, being grounded in identity, experiences, and other factors that seem much more intangible than traditional business measures, requires even more complex considerations. As shared previously, we must [...]

Merging after intersection. In the real world, there are dual-carriageway which becomes a bi-directional highway after crossing the junction. These intersectiona are tricky to map as there are many ways of modeling such intersection which will replicate the actual traffic flow.

Intersection Modeling | Mapbox

Cognitive maps, mind maps, and concept maps ultimately enhance our cognitive understanding. Using one technique over another will not make or break a project. Ideally, a combination of all three will be used as needed at different points in your process, depending on your needs. References Buzan, T. (1993) The Mind Map Book. London: BBC Books

Cognitive Maps, Mind Maps, and Concept Maps: Definitions

A mind map (also sometimes written as mind map) is a graphic representation of information, e.g. to visualize a hierarchical structure. British psychologist Tony Buzan created and popularized it in the 1970s. Its methodological application, the act of mind mapping, brings order and reasoning to a given thought process while activating the ...
