A logbook (a ship's logs or simply log) is a record of important events in the management, operation, and navigation of a ship. It is essential to traditional navigation, and must be filled in at least daily. The term originally referred to a book for recording readings from the chip log that was used to estimate a ship's speed through the water.

Logbook - Wikipedia

Sometimes it is not done for weeks and they make the entry in the log book without doing the test. Radar Performance test checks the transmission and receiving power of the radar. For example if the transmission power of the radar is not enough, radar may not be able to paint some of the target at all.
